## Luxury Residential

George Jackson Limited has wide-ranging experience of complex high-end residential projects. We can act as your specialist partner from design through to installation. Our reputation for the finest quality and craftsmanship is built on our understanding of, and ability to deliver, the attention to detail and level of finish that is expected in these luxurious homes.

Our Jackson Range contains handcrafted products to give you an exclusive finish. Using inspiration from our vast collection of historical moulds, we can also create bespoke designs to make your residence truly unique.

Our focus is always on delighting our customers. We achieve this by producing and installing elegant plasterwork and meeting all budget and programme deadlines.

## Hotels and Leisure

George Jackson Limited is the definitive leisure project specialist, with prestigious projects such as The Ritz and Café Royal in London, Celtic Manor in South Wales, and several West End theatres and art galleries in our portfolio.

We understand the cost and time constraints inherent in each project and work closely with your design and construction teams to deliver excellent workmanship and finishes, keeping to agreed manufacturing and on-site programmes of work to ensure timely deliveries.

Our unmatched experience and expertise will enhance every project, whether it is specialist restoration work or simply adding a sophisticated twist to modern leisure and retail environments.

*Chanel, Bond Street*

George Jackson Limited has extensive experience of manufacturing and installing feature ceilings and decorative panels in luxury brand flagship stores such as Burberry, Chanel and Longchamp, as well as shopping centres, international head offices and airports.

Bespoke ceilings are manufactured from GRG or fibrous plaster, allowing the fast and safe installation of eye-catching and complex designs.

For over two centuries, George Jackson has delivered commercial projects throughout the UK, including hand-crafted products and solutions for notable brands and institutions.

We understand the cost and time constraints inherent in each project, and work closely with your design and construction teams to deliver excellent workmanship and finishes, keeping to agreed manufacturing and on-site programmes of work to ensure timely deliveries.

## Heritage

We have an unrivalled history spanning over two centuries; George Jackson was the pioneer in the production of composition embellishments and fibrous plaster and we still hold moulds today that were used in the historic decorations of royal palaces, museums, stately homes and theatres.

Our reputation precedes us and we have an unparalleled list of heritage buildings in our portfolio, from Buckingham Palace to the SS Great Britain, the Café Royal to The National Gallery, Osborne House and Kensington Palace.

Our experienced craftsmen will work with your design teams to take squeezes of existing mouldings on site or, using inspiration from our collection of 11,000 moulds, aid in the design of new compositions. We then manufacture and install to complete a beautiful and authentic heritage project.

George Jackson Limited also carries out restoration work, repairing localised damage or replicating existing designs to bring a building back to life.

*Composition enriched fireplace*

George Jackson used composition in 1780 as a means of producing enrichments without using wood carvings. This 'compo' putty cures to a very hard finish and is used as an embellishment to fireplaces, decorative panels, dado rails, picture frames and all other joinery and architectural features.

Today, we are the only company that carries out large scale work of this handcrafted product and we retain a collection of over 11,000 reverse-cut hardwood moulds, one of the largest in the world, offering a very extensive range of designs from which to select. This library of enrichments allows unlimited design possibilities and can be viewed either at our premises or by visiting our on-line database.

*Liverpool John Lennon Airport*

GRG

Glass Reinforced Gypsum (GRG) is the modern method of producing bespoke plaster ceilings and features. The dense nature of GRG and the tensile strength of the fibres allow the production of thin, lightweight sections which are visually attractive and give us the ability to produce perfect curves with flush finishes.

Moulds are made by hand in our factory and the GRG is cast from these to give perfectly smooth and defined features. Specialist craftsmen are then used on site to fix the casts together and create a seamless ceiling.

George Jackson Limited offers a full design, manufacture and installation service to produce GRG for bespoke feature ceilings, column casings and a range of other plaster details used for interior decoration.

*Corbels for private residence  
in Kensington*

*Hanover Lodge, Regents Park*

As pioneers of fibrous plaster in the UK, we have two centuries of experience in the design, manufacture and installation of this versatile material, producing interior architectural features such as decorative ceilings, arches, cornices, columns, ceiling centres and roses.

Our quality is defined by the sharp finishes achieved and our on-site craftsmanship at edge details and mitres. Select from exclusive product ranges collected over our long history, or develop bespoke designs to set your project apart.

George Jackson Limited's architectural library, containing a large number of historical documents, books and drawings, is available to assist in the design development process and our modelling service offers you the ability to achieve individual design solutions to satisfy any scheme.

We are able to draw on our vast and unique collection of boxwood moulds, from which countless embellishments can be produced to create an eye-catching bespoke cornice.

# The Jackson Range

George Jackson Limited's exclusive hand crafted range will add elegance to any interior. Select from cornices, friezes, corbels, mouldings, capitals and ceiling roses, all available to view on our website.

To achieve the best solution for your room, we can provide samples and CAD drawings to aid with the design. We have a solution for every type and period of building that will add rich architectural detail and can supply mouldings direct to your builder, or provide the installation service on your project.

If the Jackson Range does not meet all your requirements, our team can work with you to create bespoke designs. Please contact us for more information.
